

IVS / AI / Tripwire Setup and Configuration

- To set up an IVS notification, navigate to the Main Menu and select 'AI'

- From the list on the left, select 'Parameters' (A)
- Select 'Smart Plan' (B), turn the bulb on (C), and then select 'Apply'.

- Select IVS
- Select 'Add' (D) to add a new IVS rule
- Select the rule type (E) ('Tripwire' is most common)
- Click the pencil icon under 'Draw' (F) to draw the tripwire

- Name the rule if you would like (G)
- Choose the direction - A to B, B to A, or Both (H)
- If you have AI cameras you can enable the AI filter for Human, Vehicle, or Both. (I)
- Left click where you want to start the line. Then, left click where you want the line to end or pivot. Right click to finish the line.
- Right click to go back one screen, then select apply.

- To receive push notifications for your new IVS rule, you can subscribe to it in MontavueGo Mobile
- Select the Home icon, then select 'Message'
- Click the '+' icon in the top left corner
- Select the name of your NVR (J), then flip the toggle switch to the 'on' position (K)
- From the notification type list, select 'IVS' (L)
- Select the type of IVS notification you want (usually 'Cross Line')
- Select the camera(s) you'd like to enable this notification for
- Select back, then back again.
- Click the disk / save icon in the top right corner (M) to save your notification
